

I am writing to request that LPFM stations not be expanded and given priority over FM translator stations. I believe these regional and national services provide a great value to the local community. Our community is serviced by on such service on 104.3 K-LOVE. I consider them almost a resident of our community. They provide announcements of local events and support many local events. Their service is wholesome, family friendly programming that I am not worried about what my family may hear when it is on. That is not the case with most of the other FM stations in my area. Very often the other stations have coarse jokes and improper conversations, not appropriate for really anyone, much less children. This is not the case with K-LOVE and 104.3 in my area. I will never hear anything like that on that station. They are nothing but positive and encouraging. That is what they claim and how they perform. That is the type of programming our community needs. If they were displaced, I doubt another with the same good values would replace it. Please consider this in your decision. Thank you for your valuable time in reading my comments and in making your decision.
